

ANCILLARY

TSC-SRT

Sounder Removal Tool

Features

- ▶ ABS construction
- ▶ Multi-use tool with embossed text either end to signify intended device

Description

The removal tool (TSC-SRT) is used to release a base sounder or a wall sounder (that has been locked onto its mounting base) with ease. The device has two varying size ends, one being 2.50 mm, and the other 3.30 mm; allowing it to be used on a YBO-BS (Addressable Loop-Powered Base Sounder) or CHQ-WS2 (Addressable Loop-Powered Wall Sounder).

The end of the tool is inserted into the sounder/sounder base and pressed down to release the locking clip within the mounting base.
