

# NC-D-PT

## Conventional hand held device programmer

### General

The NC-D-PT is a hand-held tool for programming and configuration of NC-Series conventional point and beam detectors. It can be used to read parameters and set the operating modes and sensitivities of these devices if the default settings require adjustment for harcher or special applications.

## **Functions**

- Configure conventional point detector sensitivity levels
- Configure conventional point detector status LED powered indications
- Configure conventional beam detector sensitivity levels
- Configure conventional beam detector beam range

### **Details**

- Hand held & portable
- Easy operation
- 4-digit alphanumeric LCD display
- Low-consumption, hibernation and power saving functions extends the operating time
- · Battery low indication

## NC-D-PT

## Conventional hand held device programmer

## **Technical specifications**

G	er	1e	rai

Status indication	LCD display
User interface	LCD display
Compatibility	NC-Series point & beam detectors
Connectivity	I2C & fly leads with clips

#### **Electrica**

Electrical	
Batteries	1 x 9 V (Laminated)
Current consumption	≤100 µA (Standby) ≤8 mA (Operating)
No. of cable cores	2
Terminals	1
Auto power off	100 s

## **Physical**

Physical dimensions	$64 \times 164 \times 24 \text{ mm (w x h x d)}$
Net weight	150 g
Colour	Grey
Material (body)	ABS

### **Environmental**

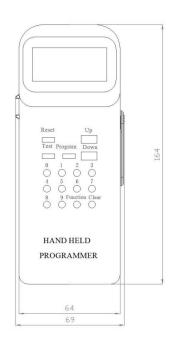

Vandal proof	No
Operating temperature	-10 to +65°C
Storage temperature	-30 to +75°C
Relative humidity	10 to 95%, Non-condensing
Environment	Indoor

## Regulatory

Compliancy	CE, REACH, RoHS 3, WEEE
Certification	CE

#### Compatible products
