

FireProtect 2 (CO) Jeweller

Wireless fire detector with a CO sensor

The device comes in two versions: with replaceable batteries (RB) and with sealed batteries (SB):

- FireProtect 2 RB (CO) Jeweller
- FireProtect 2 SB (CO) Jeweller

Accurate fire detection

CO sensor

- A built-in chemical sensor accurately detects CO levels for up to 10 years
- A warning is provided when the CO concentration reaches the dangerous level of 50 ppm before the first signs of poisoning appear

Interconnected fire detector alarms

All FireProtect 2 RB/SB detectors in the system can be interconnected and raise a fire alarm simultaneously if one of the devices detects a threat.

There are two types of interconnection, namely primary (via an Ajax hub) and fallback (detector-to-detector), which work in parallel. In case of danger, an initiating detector sends a fire alarm to the hub, which, in turn, activates the primary interconnection. This activates the built-in sirens of all fire detectors in the system in 20 seconds. Meanwhile, the initiating detector activates the fallback interconnection and sends the alarm to other fire detectors. Even in the worst-case scenario, all fire detectors in the system notify of the danger within a minute.

System supervision

- Regular polling of each system device to display current states in apps
- Automatic detector self-diagnosis with state reporting to the hub
- Up to 1,700 m (5,550 ft) of wireless communication, or twice as much with a range extender
- Instant maintenance notifications

Additional features

- Automation scenarios activation
- Visual alarm verification using MotionCam detectors or cameras
- Indoor/outdoor siren activation
- Sending alarms to CMS
- Built-in 85 dB siren
- LED indication of detector states

Quick installation and setup

- SmartBracket panel to mount the device without disassembling the enclosure
- Pairing with a hub via QR code, with remote control and configuration in the app

Compliance

RB version EN 50291-1:2018

SB version
EN 50291-1:2018
BS 5839-6 (Grade F1)
BSI KITEMARK Carbon
Monoxide Alarms KM 797661

Compatibility with hubs and range extenders

Communication with a hub

Jeweller communication technology

Frequency bands

866.0-866.5 MHz 868.0-868.6 MHz 868.7-869.2 MHz 905.0-926.5 MHz 915.85-926.5 MHz 921.0-922.0 MHz Depends on the sales region

Maximum effective radiated power (ERP)
Up to 20 mW

Communication range up to 1,700 m up to 5,550 ft In an open space

Power supply

RB version
2 × CR123A battery
Up to 7 years of battery life

SB version

2 × sealed lithium battery

Up to 10 years of battery life

Installation

Operating temperature range from 0 °C to +50 °C from 32 °F to 122 °F

Operating humidity up to 80%

Enclosure

Color white, black

Dimensions
44 × 86 × 86 mm
1.73" × 3.38" × 3.38"

Weight

147 g
5.18 oz
5.04 oz
For RB version
For SB version

Protection class IP20

Complete set

RB version
FireProtect 2 RB (CO) Jeweller
SmartBracket mounting panel
Installation kit
2 × CR123A battery
(pre-installed)
Quick start guide

SB version

FireProtect 2 SB (CO) Jeweller
SmartBracket mounting panel
Installation kit
Quick start guide
