

Enuresis/Bed Wet Sensor

Part No. QT635

Overview

- Designed to trigger a call when moisture is detected in a patient's bed.
- Connects to Quantec via the jack socket on the QT637 Enuresis/general purpose interface socket.
- Typically positioned across and over a mattress, directly underneath the bed sheet.
- Protects against patient discomfort and reduces the number of incontinence checks staff are required to make.
- Measures 80cm x 12cm and is supplied with a 2m lead and normally open right angled jack plug.
- Wipe clean design can be re-used many times.

Technical Specifications

Compatibility ${\it Must be used in conjunction with a QT637\ Quantec\ Enuresis\ Sensor/General\ Purpose\ Interface\ Socket.}$ Indicators Enuresis Active indicator on QT637 will flash red every four seconds when the QT635 detects moisture.

Connections 6.35mm (quarter inch) jack plug.

Product dimensions (mm) 800mm W x 111mm H. Includes a 2m lead.

Construction & finish Plastic. IP Rating TBC. 140g Weight

Operating conditions/temperature -5°C to +40°C. Max relative humidity: 95%.
