MED Protective Cabinets

STI-7535MED

STI-7531MED

PRODUCT OVERVIEW

These MED Protective Cabinets allow MED units to remain protected but still highly visible in the event of an emergency. They mount on the wall enabling appliances to be stored in a central location and are capable of housing CPR accessories. These cabinets are secured with a thumb lock, allowing instant access. To further protect against misuse, vandalism and accidental damage, these models are fitted with a sounder and strobe light, drawing immediate attention to the area.

HOW IT WORKS

External mounting tabs allow the enclosures to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. They come complete with mounting accessories, tamperproof screws, and a wire shelf.

KEY FEATURES

General Information

- MED Protective Cabinets help protect against misuse and keep the MED's protected and in working order.
- Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Design

- Robust protective cabinet protects MED's located in public areas where there is a history of misuse of the equipment.
- MED Cabinets supplied with thumb lock to allow instant access to the device in the event of an emergency.

Construction

- Tough UV-stabilised polycarbonate housing can withstand the severest of knocks.

Installation

- External mounting tabs allow the enclosure to be easily installed on to any wall surface.
- Includes mounting hardware. Optional gasket and tamperproof mounting screws available.
- Supplied with a wire shelf as standard.
- Typical working properties of polycarbonate are -40°C to 121°C (-40° to 250°F).

Options

- Choice of 95dB audible siren alarm or a 100dB strobe/siren with flashing beacon, both powered by a 9V PP3 battery.
